I have about 320B liquid and a few rares. What are you looking to pay per M?

Just wondering how much would \$500 get someone, rares wise

Depends on what you consider rare, and what item you want. It won't get you anywhere near a partyhat or anything if that's what you're thinking.

It's been a while since I've played. I know value is probably going up but it was around \$.70c per OSRS Mill and 30c per rs3 mill when I was playing... Something like that anyways

Are you in the market? If so, PM me and we can talk about some prices if you're interested.
