Just curious, why would I buy an unproven store from you as you say it doesn't have traffic or sales etc. 400\$ seems too high for this.

Why is the price \$400? Usually you sell stores when they have made money or have consistent income but this has neither.

Also I seen that you made a post 3 days ago looking for a developer for a Shopify store??!!

Something fishy going on

Can't you disclose more information on here? Why do I have to PM you?

True, might have priced this a little bit too much.

Nothing fishy here. I paid a guy to make me this site. But I've ended up partnering up with somoen on another store. So that means I don't need this. Just trying to get rid of this and get some money back.
