this telegram bot has all of the features you might need to boost your business.

i tested all functions and they all worked perfectly.

here is the result of the scrapped members, CLEAN!

also here is the mass add to group gui + result

i recommend everyone to buy this tool, it's only for 35\$.
also the source code is well detailed and you can read what each line is made for.

10/10 GLWS!!

Stanley - October 8, 2022, 9:45 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

I recommend giving away a vouch copy + telling the exact price of the program/source code you're selling.
Either way, GLWS!

A vouch copy has now been provided to a user. They will post their review after testing the program for a bit.

I also added the price in the thread. \$35 regular price but \$25 for the first 3 buyers!

Thanks,

Looks great. I have a few questions:

Do we need proxies or anything else along with this tool in order to work?

Are you providing the tool only or the source code as well?

What is the duration you plan on keeping this alive & updating it if any problems arise?

Are you planning to add any features to this bot in near future?

No you don't need proxies at all. The majority of my testing I didn't use proxies.

I provide the full, unobfuscated Python source code

Into the foreseeable future. I always tinker with my projects and make improvements here and there. I won't ever stop doing that.

Yes I am. The next feature on the list is to support reading of multiple proxies from a txt/csv file and code a proxy rotator function.

Yeah I am in the process of making a GUI. Personally I prefer CLI tools and Python requirements really aren't much of a barrier for anyone that has even a small amount of technical knowledge.

MrSpecter - October 16, 2022, 8:04 am

I would be happy to do a vouch on your scraper/adder if you want

elitee - October 16, 2022, 8:06 pm

25\$? or you sold 3 already?

I've already given out a vouch copy to DeepWeb as you can see from his positive review above ^^

(Oct 16, 2022 08:06 PM)elitee Wrote: [\[CITE\]](#) 25\$? or you sold 3 already?

Over 3 copies have now been sold. The price is \$35 which is still a steal imo considering you receive the full unobfuscated source-code, not just the program.

(Oct 10, 2022 10:15 AM)MrSpecter Wrote: [\[CITE\]](#) Software with a GUI would be more interesting for novices ... Good luck with sales sir

Good news, I released the GUI Executable Version (.exe). I've slightly changed up the sales structure. The price for the executable program remains the same at \$35 but you can alternatively still purchase the full unobfuscated Python Source-Code via a separate link for \$130. This includes full rights to do as you wish with the code. You can edit it, sell it, etc.

Hey mate, no this doesn't include an account creator. I will work on creating one as an add-on if there is enough interest.

(Oct 28, 2022 02:51 PM)sn0ffleren Wrote: [\[CITE\]](#) hello . how many people can one account add to the group per day? and may i have your discord i have some questions. thanks in advance

You can add as many as you like. There is an adjustable interval setting which dictates the amount of time between adding users to a group (in seconds). Although I suggest being conservative as if you perform too many actions too quickly, your account may be flagged by Telegram.

FYI I don't have a discord but you can add me via XMPP/Pidgin: devi0us@sure.im

I'll buy soon!

SIM-2570063 - November 2, 2022, 11:50 am

Ok so can you scrape members from a channel and add them to a group? How many accounts and proxies would I need to make a group of 10,000 people? I'm highly interested in this tool, if possible can I test it and see how it goes?

elitee - November 2, 2022, 12:57 pm

How I can contact you, please?

I bought the bot but I have issue

It's the same GUI (CLI - command line interface) but the difference is in the executable version the code and all dependencies are conveniently compiled into an exe file so it's easy for everybody to run.

That's right. You can scrape members from as many channels as you like and you get a lot of customisation such as only scraping members who have been online today/yesterday, online in the last week, online in the last month, etc.. so that you're only scraping active users for example.

As for your specific question, it's really like asking how long is a piece of string as it entirely depends on the account being used along with your ISP/proxy and the defined execution delay. If you're using a personal account that's years old with no proxy you could probably add all 10,000 from the 1 account if you spread your actions out over the course of days and maintain a consistent period of downtime where no actions are performed each day, etc.

There are similar open-source scrapers that exist, of course. The Telegram API provides a certain limited set of values on each user including their username, user ID, display name, email address (if public) and phone number (if public). Therefore of course it's only natural that programs which scrape from Telegram will record the same datasets which will look similar. However I implore you to find an open source tool which encompasses all the features of my program (scraper + mass-add-to-group + mass-message + multi-account support + proxy support + detailed user active-status targeting, etc.)

(Nov 7, 2022 10:33 AM)dreexy99 Wrote: [\[CITE\]](#) Is this still working? If yes, please send me a message as I have a few questions - thank you.
Yes indeed. I'll send you a message now. I've just released a new update to the program, working and tested still ?

JuiceBoxCereal - December 6, 2022, 10:07 am

I bought this program, then I bought a telegram account. I ran the software and it would

automatically crash after selecting the option to post. It works only for connecting to your account API. OP doesn't respond to messages on Discord. If anything \$35 for this and \$3 for an account ain't much to lose but sad to see.
