I find hf slots very fascinating and fun thing to do. How would I go making a gambling website linking real money to slots instead of bytes?

Perfect.

Don't know how to rip off a site?  
Ask the site for free help on how to do so.  
???  
profit

Damn phantom  
not bad my man  
I just want to make a gambling website like hf slots, I don't know how that affects hf ?

Plus that's illegal in many countries. You would need to get a permit and follow many rules and regulations.  
I might weigh in here.

You would need at the very least, a curacao sublicense from a license holder, however in saying this;

"Curaçao intends to implement a new iGaming regime by March 2023 but a radical overhaul could mean the island's licensed companies move elsewhere. "

"Many companies are now looking into other licence options because they are afraid that Curacao's rules will be very strict."

It's probably too late to consider this an option.

Gambling is legal in many states. Even if you are in a state that it is illegal, you can access a site based in Las Vegas.
