Thread: [Place to buy steam gift cards/games at discount?](#)

Dank OSRS - October 13, 2022, 1:39 am

Hello, I am new to the whole PC Gaming scenery. I played games through xbox one for years. I finally took my anger out on my xbox one, and decided was not gonna purchase another one and start PC Gaming.

For now, My setup is through a laptop with some rather nice cheap specs:

Processor:

AMD Ryzen 5 4500U with Radeon Graphics 2.38 GHz

Installed Ram: 20.0 GB (19.4 GB usable)

Windows 10 x64 bit processor

As of right now, I am a big Apex Legends player. Unfortunately, I am not able to transfer over my progress from Xbox one to PC and I have to start over, losing all of my skins and characters locked again. This has stunned my want to play the game. And I'm looking to branch out. I may download Call of Duty Warzone again and perhaps get back into it but I'm not quite sure yet as I really just don't like it to be honest.

Games of interest that I may like to try, Elden Rings the new one that they came out with looked really neat, But also the one that I'm REALLY INTERESTED IN is DayZ. I've tried it on Xbox One through Game Pass and I have to say it was hard to be honest, Though to be fair I had no fucking clue how to even play the game I found myself constantly looking up tutorials how to do this, and how to that. I think, I would love to finally learn how to play the game and learn. But I would only do this basically if I learned to play on PC.

Games are expensive on PC I've noticed. And I am trying to find a way to make it either free, or cost next to nothing and affordable as I am 27 and have a 5 month old son and live in the USA where we have a fucking moron for a president and everything is costly nowadays.

Please show me ways to get steam balances for cheap or free? Or, Show me where and how I can download and install a LEGIT VERSION of DayZ without viruses please!! Would be super amazing!

First find a seller here on HF who can assign your country to Turkey.

Turkish rates on games are insanely cheap.

Then on G2A, Kinguin or any number of other online marketplace buy Turkish Gift Cards for steam and use them to buy games via steam.

Example COD MW2 is currently \$79.99, If purchased in Turkey it costs \$60, Cyberpunk is \$39.99, it costs \$16 if turkish account.

hope this helps.

Any reason why it's so much cheaper over there besides an exchange rate?

Salary.

According to the official information of the Turkish Statistical Institute, women in Turkey on average earn 46,208 liras per year, while men earn 50,297 liras.

50,297 Turkish lira equals
2,707.91 United States Dollar

\$60/game would be the equivalent of a \$1,260 game in the US. It actually costs them about the same.

Ah. I think this was one of the ways to get RS membership cheaper.

They killed off all legal methods sadly, I don't go into sketchy areas with my upgrades so I won't be providing unfortunately.
