Thread: [Can BTC reach \\$100.000 next year?](#)

FelixSFX - October 14, 2022, 12:16 am

Can BTC reach \$100.000 next year,I think it is possible. At present, I think the price is very low. There are many bad news, but it has not fallen much. It proves that it has come to an end. I think it will rise at the end of the year. What do you think?

Note: This is just my personal opinion

bevc - October 14, 2022, 12:32 am

Well it could, but it ain't gonna. People have got other things to worry about than weird internet money, and as always it depends on what the whales do.

FelixSFX - October 14, 2022, 12:46 am

The market is determined by them, but I don't think they can keep the price down.

Bastille - October 14, 2022, 12:59 am

If the war didn't start I think we should have expect something good in a near future. But now, people have more worries than before and things to fix in priority.

FelixSFX - October 14, 2022, 1:09 am

Yes, if the war happens, I think it will continue to fall

Charlie Sheen - October 14, 2022, 3:57 am

It's entirely possible, but I'm going to go out on a limb and say no. Someday it will. But not in the next year.

Koyote - October 14, 2022, 4:08 am

I don't think so, but at the same time it wouldn't surprise me. Next year will be an interesting one for some of the alts though for sure.

nelz - October 14, 2022, 7:57 am

Nah next year is looking crap, maybe 2024 at the very best lmao.

LeetSpeed - October 14, 2022, 8:14 am

Nope it will most likely go down even more. We'll have to wait a few years to see that happen.

Aeowulf - October 14, 2022, 9:55 am

Hahaha... hahah. No.

I think it will eventually. Not within the next year. Times are going to be tough for a while, then, we'll see if it stabilizes or we get another peak.

MOE - October 14, 2022, 9:57 am

Only 18 months until the next halving...what goes down must go up again...?

Upgrader - October 14, 2022, 10:08 am

Very unlikely, we can be hopeful though.

Motusora - October 14, 2022, 10:08 am

in next 3-5 years i think it's possible .

?-Elision- - October 14, 2022, 11:56 am

Not next year but by the end of 2025/2026.

SA777OSHI - October 14, 2022, 2:15 pm

Very unlikely to be honest, and I hope we have more downside on all the markets, everything was getting out of control and getting too expensive, I think a recession would be healthy at this point, and I did not sell at the top, actually I'm at a loss right now, most of the BTC I bought was at 28k, but I feel like a recession would be healthy, even though my investments are not doing good.

xtray86 - October 14, 2022, 2:52 pm

I don't think so, but at the same time it wouldn't surprise me.

GruntStyl - October 14, 2022, 3:54 pm

Technically it could in a month lol.. Highly unlikely. It's just so unpredictable. I think we should be pretty happy it's stayed as stable as it has lately given the war and everything else going on in the world at the moment.

Give it 3-5 years and I think we will be sitting close to 100k.

Frost Crypt - October 15, 2022, 4:40 am

yes, is we live in 2025...

illusive - October 16, 2022, 4:57 pm

In the next few years its def possible!

cwrhyaplteo - October 16, 2022, 5:44 pm

If my calculation are correct for btc to reach \$100k we need ~\$2trillion market cap

shreder - October 17, 2022, 7:50 am

Probably not this year considering it can't even hold \$20k

webdev77 - October 17, 2022, 7:55 am

5x during a recession is highly unlikely unless you see extreme issues that cause people to liquidate their home country fiats. Even then, it's not likely BTC would be the go to option.

Semmenial - October 17, 2022, 12:06 pm

Easy 5x from current levels. I'm buying lots and lots.

Goku - October 17, 2022, 12:16 pm

2022 is the first year that BTC was ended lower than it was in the first half of the year. (I think)

So, the chance that next year it would perform better is considerably lower.

Semmenial - October 18, 2022, 9:01 pm

Stop relating time to the value of your investments and you'll thank me

Goku - October 19, 2022, 1:52 am

Honestly, I'm more relating it to real life events. And seeing how the world events are currently turning out doesn't look promising to assure a good financial future. People would be more focussed on buying food, supplies, energy costs etc than investing in crypto.

Of course, I can also be wrong. Let's hope.

Cap - October 19, 2022, 4:53 pm

I mean anything is possible but I'm not banking on it within the next year. It'll get there eventually but not within the next year. Or could it?

I N C R E D I B L E - October 19, 2022, 6:26 pm

Bitcoin is based on blockchain but its price is directly in proportion to National and International factors such as Social/Economical/Political crises and then there are whales and business enterprises playing the pump-and-dump game.
