Thread: [android studio Failed to launch an application on all devices](#)

blackcoder00 - October 14, 2022, 8:27 am

i got many problem when i want to run my app (android) can any one help me ? i tried alot of solution but no one has worked
can some one tell me why this error display to me also how can i fix it ?

Quote:10/14 17:21:33: Launching 'app' on Pixel_3a_API_33_x86_64.
Installation did not succeed.
The application could not be installed.

List of apks:

```
[0] 'C:\Users\HP\AndroidStudioProjects\tp5\app\build\intermediates\apk\debug\app-debug.apk'
Installation failed due to: "package install-create -r -t --user current --full --dont-kill --skip-verification
-S 5365156' returns error 'Unknown failure: Exception occurred while executing 'install-create':
