Thread: [HIRING FOR MASSIVE PROJECT | NEED DEVS](#)

**Upgrader** - October 16, 2022, 8:56 pm

I wanted to keep this off of HF but I am desperate for talent.

This is a new brand, we are looking to supply the following:

Proxy provider, looking to provide both ISP & Residential proxies.  
Sneaker/Retail bot -- Working with Shopify/others (can elaborate further)  
Discord group with restock monitors & other bots (Pref programmed in Golang for monitors)  
VPS/RDP provider  
+Many more upcoming

This will be a large project, needing 20+ workers. If you feel you have what it takes please contact me with your resume, this is a multi-million dollar opportunity in a multi-billion dollar industry.

Well from the looks of it you might require somebody to handle your support as well. If thats the case i can be your man :)

I have knowledge in multiple domains, but let me know if that is a requirement i will send across my resume :)

We will be looking for general support once the project is launched in at least one sector (proxy, servers, discord group, bot) although one of these must come forward first. You will be kept in mind!

Can i join i'm newbie but i know how to promote products

**Ramsey** - October 17, 2022, 9:06 am

Hit me up. I have demonstrated industry experience in software engineering. Currently a FAANG engineer.

Looking for experienced devs as a side project sadly. Although I would like to note all marketing will be handled by us.
