Thread: [BEST VPN](#)

UND3D - October 19, 2022, 11:55 am

What would you guys say is the best VPN that you've used for anonymity.

Bastille - October 19, 2022, 12:49 pm

I'm not that concerned about anonymity, I only use [censored] VPN to download via Torrents, however looking after reviews there is a cons for it "Confusing privacy policies", maybe not the best for you :/

Upgrader - October 19, 2022, 12:52 pm

MysteriumVPN, cheapest premium VPN. Residential options as well

SIM-587985 - October 20, 2022, 8:23 am

Mullvad or Private Internet Access

Beekermajik - October 22, 2022, 1:23 pm

N-o-r-d has never let me down

Royal ! - October 25, 2022, 2:29 am

There are lots of VPN services you can use like nVpn, Mullvad VPN, etc.

Richest. - October 31, 2022, 5:47 pm

I like Mullvad, it's a great VPN

Polydroid - November 3, 2022, 4:13 pm

Mullvad is easily one of my top recommended VPN services.

SIM-4932765 - November 5, 2022, 4:40 am

+1 for Mullvad, have been using their service for years.

Tobaras - November 5, 2022, 7:12 am

Big fan of Mullvad, never had issues with them

SIM-4932765 - November 5, 2022, 8:53 am

(Nov 5, 2022 07:15 AM)vvvvvvvvvb Wrote: [\[CITE\]](#) Jumping on the train and recommending Mullvad, would never use anything else.

That's a man of culture!

UND3D - November 5, 2022, 9:41 am

Imao ever since i started this thread i started using mullvad, thank you everyone!

jcole - November 5, 2022, 9:42 am

I've used Windscribe and never had any issues.

DI?E - November 6, 2022, 9:34 am

TorGuard. Never had an issue.

7 - November 6, 2022, 9:39 am

PIA lol Torguard is good use code 50OFF for half price.

Peronsally I use protonVPN these days using secure core (which like routes me through 2 countries) and the kill switch so when it dies nothing can connect to the internet. But I only use this as a first stage method of protection, after this rdp and the vnc and proxied browser

Astrill also is worth a mention as there speeds are good

[censored] and all that nonsense stuff that. Mulit-hop and use trails to the wrong places

Richest. - November 9, 2022, 5:06 am

Jumping on the Mullvad and PIA train.

SIM-5183822 - November 13, 2022, 10:36 am

I use two different options depending on what i am doing if i am downloading torrents i use a custom install of OpenVPN.

Normal privacy protections well i do not handle black hat material anymore i work mostly on the legal side so protonvpn works just fine.

If you are looking for insane privacy setup openvpn yourself or something similar any paying options has their limits of what they can legally do before they sell you out.

All paid services have two options when the hammer comes down either close up shop or give you up and anyone willing to loose millions of dollars over a random user is a pipe dream.

okp1 - November 25, 2022, 5:52 pm

Perfect-Privacy, ovpn.com, oVPN.to, Mullvad.

Almost off them using RAM Servers, no chance to collect logs, only Mullvad have some HDD Servers, you have to check at their Serverlist.

UDPz0r - November 26, 2022, 8:00 pm

Do you know any VPN that isnt bloced by hackforums?

z x v - November 27, 2022, 1:57 pm

mullvad.net / nvpn.net / protonvpn
