Not bad. Thanks for the list. I use a certain/specific google dork to discover new unknown/less competitive or low tier programs sometimes.

skull - October 23, 2022, 2:21 am

I can recommend HackerOne. Been there on the other end, as a company. From there it atleast works quite well, and payments to hackers is easy.

So good for the companies, not so good for the hackers ?

Fkn - October 23, 2022, 2:47 am

Thanks for sharing these damn, only knew a few of them

Money- - October 23, 2022, 11:28 pm

Found some while browsing around.

That's the same list. That's where I got the idea for this thread.

Pentatonix - October 24, 2022, 7:22 pm

Very nice resource, I will have to check a few of these out.

God bless you! That was what im looking for. Not seeking real money, a few box will do :) Hope those are newbie friendly ? In that case which one is better about it ? And also some tutorials inside for remember, whats gonna do and some commands will do. Using google or some videos for a damng command to launch from terminal is kinda exhausting. But dont include it to the list.

Looks like a minor misspelling here. Am guessing this should be openbugbounty.org instead.

bugbounty.ch is another.

FunkyPigeon174 - March 8, 2024, 4:18 pm

That's a lot brother ...

divu - March 9, 2024, 5:10 pm

It's betting app and it has a unlimited betting glitch, by playing the first 2 rounds of blackjack you automatically win, try to continue for 3-5 rounds you begin to lose money by restarting the app you cover your losses. I've tried it several times, 75% i win in the 1st two rounds very less times ive lost money in those rounds.

Sounds like you can abuse this for your own good. Just email the owner or support but I doubt they will take it lightly tho lol. You might as well abuse the win and take the money. Record a video doing it.

Seriously man, there's lot of resources out there that you just have to search or dork it.

REZ4R - November 19, 2025, 10:42 am

Thanks for posting. In my opinion HackerOne and BugCrowd are the best, but not for beginners because the competition is extremely high. From my experience, for beginners, I'd recommend starting on YesWeHack or maybe Intigriti.

mrbumbastik11 - November 25, 2025, 5:35 am

Hi, I'm new around here, noticed this topic and here is one that may be worth a shot: Inspectiv (can't post links, but you'll find it easy)
