Thread: [Instant VCC w/ Turkish Lira?](#)

Gashi - October 24, 2022, 3:44 am

Hi,

Does anyone know of any service that offers instant, if not almost instant VCC with Turkish Lira currency?

AFAIK there are no instant services setup for this,

These VCC needs to be bought in Turkey by someone, Then they can send you the information

Anyone know about any good sellers that can partner, or methods to obtain this?

I know the bank has to be from Turkey and that's it, but I couldn't find any virtual banks that allows international citizens.

Using fake ID or stolen ID and chance to get the bank blocked isn't an option, I will be processing a lot of money in this.

Hello brother, bank will not be blocked at any point using my service. We have a method that requires NO ID (but has a monthly limit), and we offer verified accounts. It is completely safe, you won't have any issues with your funds. Hit me up.
