Watched it a few years back and thought it was really well-done. You can expect a great story from a 90s manga.

I think everyone and their uncle has watched Parasyte already.

It's one of my most favorite anime. I would love it if it was a little bit longer series. I finished it in an instant.

I never knew that was a thing. Guess I'm on the hunt for the manga now.

Watched it to fill the void after completing tokyo ghoul, great anime.

Parasyte is one of my fav. anime because it's actually the first anime I've watched without anyone recommending it to me. I just randomly picked an anime to watch and no regret this is by far the best, periodt.

It was pretty good you should watch death note next or code geass

the anime is very dope, it is a bit weird with the morphing and all that but well worth it
