Thread: [Does Discord or Whatsapp Web have protection?](#)

UniQ92 - October 29, 2022, 8:40 pm

Hey,

The title pretty much sums it up!

Can I get an infected JPEG or MP3 file from lets say Discord?

If I open the file, will Discord not notify me?

What about Whatsapp program on Windows?

Simply put, do these programs have build-in security?

Yours,

UniQ

PS: Has Hackforums deleted it's old database or so? I had an account here 12~ years ago yet it doesn't work.
