Correct, DarkCrystal RAT. Each setup will come default with a PAID DCRAT (aka DarkCrystalRAT) license.

Agreed. It doesn't look like too much has come of it, but I'll keep a strong eye. All my setups are luckily secured, just hoping all of my clients take the proper steps to secure themselves..

The new RAT provided with the service is 100% native, requiring no dependencies to run on any Windows system! Easy to crypt with more features than most conventional RAT's, DarkVision RAT is a much better choice for my service. Now is a better time than ever to order!

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

So you will help even if I'm techtarded and probably need fairly basic help with setting it up? Obviously could pay extra if needed, would mainly buy for mentoring. Let me know. Thanks.
