Thread: [Save Any OnlyFans Picture Full Size \[PC + InternetExplorer\]](#)

SpiritualDose - November 5, 2022, 10:51 am

OnlyFans - Save ANY Photo Full Size / Quality

Method Requires:

- Desktop/PC
- Internet Explorer

This is a very simple method around taking screenshots / snipping pictures from your screen. This allows you to download the full size image very quickly without any chance of it being caught. You may be looking to build an eWhore pack, or simply just looking to save your crushes pictures. Well look no futher.

First start by going to your desired page that you wish to save the images, and hover your mouse over it. You will see what looks like a "full screen" button in the top right corner like so:

Once the visual search opens up, you will notice theres an inspect element looking screen. All you need to do is find the image in the top right corner and right click on it and save image like so:

You can now have the original image size that was uploaded at the best resolution and DPI. Now, maybe you're ready to build yourself an eWhore pack? Well there you go.
