Title says it all. I've been seriously interested in doing Fulfillment by Amazon, and I have a select few products at mind that I think could make great profits.

But curious to see if anyone on here is really doing the damn thing?

I don't, but if you have a product that will work, try it and make sure it does. The only way to know is to give a shot.

Check the search volume on helium10. Check for competitors and how you can differentiate/be better. Make sure the product has no big brand dominancy. Non seasonal of course. Calculate profits after fees via fba calculator

Lmk if you have more specific questions. I can answer to the best of my ability for you

Btw, is this wholesale or private label ur doing?

All I do really is sell on amazon.

Let me know what your questions are, would be happy to help.

There are definitely people making six figures doing it, but I am not doing it.
