Finally it's done after 12 years.. Avatar 2 is coming out next month.

Avatar 3 is nearly done as well and Avatar 4 is already partially done (the actual filming of it all already not just the scripts)

I thought they released a new Avatar Airbender :c

So, is this like a netflix type series?

Avatar released in 2010 i believe, was a big hit one of the first real 3d movies done right.

Definitely a recommendation to watch!

Ye I remember watching the first Avatar back then. It definitely was nice. Hope that the sequel will be cool too.
