Polydroid's Android RAT Setup Service

What are the uses of an Android RAT?

There are many usages to an Android RAT, a few examples are SMS interception, file exploring, location tracking, and more.

SMS Interception

- Read all SMS messages the victims phone receives, allowing you to authenticate verification codes on most applications.

File Exploring

- Explore the vast amount of files amongst any Android operating system, such as pictures, downloaded files, and more.

Location Tracking

- Track every move and keep on target with GPS tracking. It is very useful in most situations where you are trying to find your victim.

HOW DO YOU SPREAD?

There's a small setup process, but there are a few tasks you need to complete before you can begin spreading yourself.

- Encrypt The .APK File(s)
- Setup A Direct Download To Your Encrypted .APK
- Find Your Niche, Something People Want To Download, Such As Free Software

This is the most common method of spreading, but be unique and find your own methods for the best results.

ANDROID RAT SETUP PRICING

To keep our service as straightforward and easy as possible, there is only 1 plan you may purchase. No upselling, pure honesty.

\$129.99 USD

FREQUENTLY ASKED QUESTIONS

Here are the answers to some of the most frequently asked questions.

What Are The Specifications On The Windows VPS?

- The Windows VPS provided offers a 2 core CPU, 6GB RAM, 40GB SSD and shared 1Gbps network with unlimited bandwidth.

Can I Provide My Own RAT And Server?

- Yes, you may provide your own RAT and your own VPS/dedicated server, however I am not responsible for faulty RAT's or server issues.

Do You Provide .APK Crypts?

- I do not provide .APK crypts, that is at your own discretion. I only guarantee a fully working RAT setup.

TERMS OF SERVICE

By purchasing a setup, you are in agreement to my Terms of Service.

I reserve the right to cancel your service or server at any point in time for any reason.

I only give 1 .APK build per setup. It is \$25 for new .APK.

I am not responsible for the health of your server.

I am not responsible for your data if you do not pay server in time.

I am not responsible for server downtime.

I am not responsible for your actions.

Breaking the terms of service might result in a scam report.
