I did not know that it requires an upgrade now to chat with each other (I'm a very old member lol)

I will share the method with you guys here now

I will go straight to the point.

Do you able to send unlimited SMS on your smartphone for free?

Do you use an android?

If you both criterias are fitting to you, I have a very good method to earn some cash.

You will sell your unused SMS for \$\$\$

All you need is the apk to download:

Payouts are instant!

I made 10 Euros on my first day!

Check it out and hit me up if you need help!
