Thread: [live snapchat. what app are you guys using?](#)

LuxuryModelNetwork - November 13, 2022, 7:56 am

what app are you guys using for live snaps now?

i used to default to snapbytes but as he got banned from the site due to scamming im trying to find other solutions.

OctyBaker - November 28, 2022, 11:47 am

Also interested in this.

What apps are working to send live snaps.

Cant seem to get it to work.

OVF editor is free and worked great for me, lookup OVF editor tutorial on youtube (you'll need to go to snap and hit edit pic and resize it to snapchat dimensions before you use it in OVF though)

You can use it this way yes. Im not sure if you can get banned on bluestacks, but im sure changing your ip would solve the issue if that was the case.

N1ghtm4re - December 16, 2022, 5:09 pm

Are there any other working options available anyone would be willing to share?

komplexehe - January 23, 2023, 12:35 pm

for normal live snaps I use prequel. You can get it on app store and google play. If u want to post storys, you import with prequel, save it to memorys and then post it in your story from memorys. Pretty simple and working since 2 years

JNath - January 27, 2023, 9:40 pm

OVF editor works best for live snaps.

Whomedan - September 1, 2024, 1:55 am

Who can help me with the best app to use now?

Anything to get around the media upload flag ?
