Thread: [|| EX RED LION LEADER || PRIVATE MONEY MAKING METHOD | Generate 1500-3000 USD A Month](#)

Confound - November 14, 2022, 7:49 pm

Hi HF,

It's been a while since I've posted anything in the marketplace here on HF. But that said, I have a very special opportunity for the right individuals. I thought I'd let a few people in on a project I've been working on for the last few months. It's actively generating me \$3000 USD a month, and requires fairly low maintenance throughout. This project requires upfront investment, but the payoff is fairly quick and you will recoup on your initial investment within the first 2-4 weeks. Additionally, there is some set up effort which will take a few days. But once everything is in place, there is a minimal level of time that you will dedicate each day/every other day to make money on auto pilot.

Requirements:

- A computer (If you have a really powerful computer, you will save some money upon startup)
- Internet
- Some time each day dedicated toward maintaining and scaling the operation.
- Money (Expect to invest a few hundred ALL IN to cover all costs to get this operation going. This will be a one time fee. Going forward, you can re-invest profit to mitigate expenses, and you will still net over \$1500-3000 a month.)

What you will receive:

- A comprehensive in-depth step by step guide on how to generate \$1500-3000 USD a month.
- A big part of this method requires knowing the right people to source your various needs. I will provide you with every person / website / connection you need to be successful at this operation.
- I won't say 24/7 support, but just about. I do have to sleep and spend time at work/family, but I will be there every step of the way to help with any questions or concerns.

TLDR: Look, nothing in life is free. This is not a get rich quick money scheme. I have spent years testing out ways to make side money on the internet. There is nothing out there that requires no effort or investment that will yield you serious returns. This is a legit, reasonable method to generate money. It requires some work and some start up capital. If you feel this opportunity may be good for you, please feel free to reach out.

Price:

\$300

Now \$350.

I am only offering this to 6 people. The price will stay \$300 for each slot.

Edit: Price for last 2 is \$350 since folks are getting excited about the method.

Confound has been great so far with setting everything up. It took a bit to get everything locked in, as you have to acquire some things/tools related to this method to gain access to start earning money. But after everything got set up, I now see everything running as expected. With my current projections, I expect to make around 350-400 this first week. I'll keep everyone posted on this thread with my updates.

It is definitely something that can make you \$1500-\$3000 or more as confound claims. However be prepared to invest a good amount to get everything going. Confound has been there every step of the way and has answered all my questions.

I currently have everything setup and should make my initial investment back within 2-3 weeks.

seems interesting will have an eye on it dont have the investment for it yet ! good luck my friend

james400studio - November 15, 2022, 8:46 am

It seemed interesting, but since seller isn't accepting MM (MM releases money once I make just \$50 back) , I will give it a pass for now and will wait for reviews. Good Luck.

Confound - November 15, 2022, 9:56 am

Middlemen won't work with this deal. Thanks for your interest though.

People are forgetting what influence I've had here on HF. If you feel a MM is necessary for our deal, then you are not the right customer.

Thanks for your interest everyone. Spots left, please let me know if you are interested. Again, I will be mentoring, coaching, assisting, troubleshooting and guiding you along the way to profit. This is not a scheme where I will be dumping you with a method and leaving you in the wind. That's not how I do things here.

_Misery - November 17, 2022, 7:50 am

After giving it some thought, I'm relinquishing my reserved slot.

OP was kind enough to answer all my questions, and went as far as to explain the gest of what'll be happening, but it's just not for me.

BUT, the field is indeed profitable, and I advise people to ask OP some serious questions because for the right people, this is a good gig.

I did not hesitate when I saw this opportunity because Confound is legit and if his stuff doesn't work, nothing else will. It has been kind of a slow setup for me due to a few hiccups along the way (which includes my own mistakes) but things are moving right now and within a week or two I should start seeing some good earnings. You need to invest a few hundred into this and be prepared to put in some work on the setup. Don't worry though because you can trust that Confound will be there every step of the way.

I must vouch for the outstanding support I've gotten and the resources/contacts that Confound has hooked me up with. He is very helpful and patient as well. For as long as this thread is active and spots are open, I will be updating with my progress here.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Let me just say f*** whoever talks sh** about Confound. This guy is just the kindest and most caring "mentor" I've had. He has helped me in every possible way imaginable even when I had difficulties.

I'm finally running this now and I kid you not, within a day or two now I've made atleast \$200. If I can scale this operation I can easily see much more in a shorter time period.

I see there is one more spot and I really do hope it is the last one because of how delicate this is. If you are able to put in the work, be patient/resilient then you can make a bootload out of this. Super vouch for Confound!

I'm running this as well, not sure how you could possibly make that much in a day or two considering your total investment is \$500-700 or more.

Unless you're insanely lucky, I don't see how this is possible.

Try to refrain from discussing too much in public forum, but yes his RNG really kicked into hyperdrive today. Without getting into detail, I'm sure you can determine what that meant.

For outsiders unaware what we're talking about here. There are average rates for profit per hour. Sometimes your profit in a day may exceed the average.

I'm not mentioning any specifics, I guess we're just at two different extremes with this method.

I've been running this for a week and I've lost 2 essential things and the only solution is to throw more money at it or hope for the best.

After a week I have a total of \$70 returned and since losing 2 things that I need, it'll be even harder to get my investment back.

Not sales trashing, just giving my experience with it.

Dog. - December 6, 2022, 11:59 am

Alright, it's time. I've been working with Confound for the past week or so and I think I've gotten enough information to give a proper update, although I'm not sure how much this matters as the last copy has been sold.

1. The major point that I have is that this is not something you should be interested in if you don't have ample cash room. The \$300 cost is not much compared to what your initial investment will be, and there will absolutely be some who need to invest more than others for reasons that are very subtle, or simply out of your control completely. I can attest that Confound is making efforts to try and pinpoint these reasons and minimize them as much as possible for the future, but you need to be able to stomach losses. Keep reading.

I've invested \$900 on top of the method. I will admit I went over the top in my preparation and chose to invest in more startup material than strictly necessary, this will look more like \$600-700 for those who do the minimum viable setup.

2. This is a market that you need to be willing to put in the time to research thoroughly. I spent a lot of time the first week to really get a grip on the mechanics and risks as I much prefer learning things for myself. Confound has been great with answering questions that are hard for me to otherwise get definitive answers for, but I think everyone who follows through with this shouldn't solely depend on that. It will be very easy to spend the minimum time necessary (about 10-20 minutes a day), but IMO you need to be curious enough about what's going on to want to sink hours a day reading up on everything available on this, but then again - this is required to do essentially anything well.

As for the market itself, IMO it is in a rough state at the moment. It still works well, but the going is tougher, so you will need to be more careful and accurate in your decisions. Hence the need to be willing to sink time into this. Again Confound is a good resource for this, you don't need to be approaching the market from scratch.

I have yet to find any reasonable doubt that the market's "difficulty" won't shift back. This is the real world, situations ebb and flow all the time. There is no formula you can copy paste over and over with no variance. You will need to constantly monitor what's going on and change your own practices accordingly. I doubt any teacher in the world will sit here and dm you every observation they have about the market for the next decade.

I will note that this isn't necessarily a bad thing. You should be making accurate decisions regardless.

The combination of 1 and 2 is critical because in this market, sometimes you can do all the right things and you will still experience more losses than the guy next to you. You need to have the cash to keep reinvesting if you've done enough research to believe for yourself that this is something worth doing.

As for Confound himself, he has good experience. Use him. He won't have a list of 100 things where "all you need to do is read this and you'll be an expert too", his mentorship reached peak value when I knew enough to ask the right questions. No complaints. Good guy to have intelligent conversations about shit with.

Currently \$150 ROI. Has been running for about 4 days, but at an extreme handicap for 3. Will hopefully bring it back to full performance within the next 2-3 days. I have high expectations based on the one day of peak performance, but will absolutely come back with an update if it goes south.

Honestly I think a customer Discord could be useful to pool info. Otherwise if you're also a customer

send me a PM and let's get in touch.

TL;DR I like this so far. Not sure if it's for everyone though.

total invested was around \$1500

so total profit of \$1200 after 2 months.

Has slowed down a bit the last 2 weeks.

I'm curious to see what your update is now. Are you still doing this? Is it still worth the time? OP is selling new slots, so I'm curious how your experience went since this post.

Interested to see how this method has preformed thus far. Interested in a copy

PenteZ - February 18, 2024, 9:31 am

So you sold it all now?

Bos™ - April 6, 2024, 6:56 pm

I don't understand why you being redlions leader is relevant?

Also, i will ask the always-asked question.

Why sell if you can do it your self.

My answer:You can hire other.

Trust is everything. My reputation is relevant, and trust on HF is big when considering who to do business with.

As for why sell, because I can, and because I feel like it.

Thanks for your quality post on my thread.

Honestly I'm replying because I really like your signature...

on topic though, just curious if you are waiting til all slots are filled to mentor 1 group at a time, or if this is personal 1 on 1 mentoring?

Signature is from 2015, user no longer active.

As for mentoring, it's 1 on 1.

Thanks

Any more updates from previous buyers?

Legacy - April 26, 2024, 9:50 pm

Will wait for some concrete earnings proof from customers.

Things slowing down has everything to do with his time and effort spent working.

Has absolutely nothing to do with the method. You have to maintain work about 20 mins a day. It's a must. Without maintaining the work it won't continue entirely on your own. it's not auto pilot. It's a real way to make money, those require work.

Some users are still active in the method, yes. Some not anymore. Method is just as profitable if not more profitable since time of OP
