Thread: [Simple SSH Vuln Checker in Python \[SOURCE CODE\] \[WORKING\]](#)

Polydroid - November 18, 2022, 6:35 am

This is a simple SSH vulnerable device checker. It will simply load your list in, check to see if the device is online and port 22 is still open.

How to use: Extremely simple, the script does it all.

python filter.py ssh.txt

OUTPUTS TO: active.txt

THEN use my [SSH loader in GO HERE](#) to load the bots!

zanoi - December 1, 2022, 10:58 am

python3 filter.py ssh.txt

xxx

Traceback (most recent call last):

File "filter.py", line 31, in <module>

g0d.join()

NameError: name 'g0d' is not defined

root@provey:~/d#

Why use python for checker and go for loading?

Russu - September 22, 2023, 4:33 pm

NICE BRO WHAT this script can do

stary.zmlekiem - September 30, 2023, 11:16 am

GREAT script it really help

Lolol538 - October 2, 2023, 10:30 am

Yuusss please! lol ive been actually looking for something like this
