honestly I used to take a bowl of milk, and put 3-5 oreos in there and eat with a spoon. Replacing eaten ones with new ones, I'd probably eat 20 at a time man. Terrible

Oh hell no.
The mush when it sits with milk is not the same.

If I drop an Oreo, it's a goner.

I can understand this, but I dip for the subtle mush. Not a full mush, I imagine if you ate it fast enough it could hold it's consistency & texture a little bit.

Lyrlei - November 18, 2022, 9:24 pm

Meh. It also helped that I worked at a retail store and got 30% off + my associate discount of 15%. From that alone i've given away tons of kitchen appliances like waffle makers and stuff. Sometimes I miss that job. Seriously though - if you like to dunk stuff in milk just buy it. Treat yo self.
