A quick google tells that you have scammed a couple guys? What's up? Did you pay Tate for the
promotion? or did he really used your service?

Hey brother I don't see any complaints on my name on google besides one youtube video which I
have no issues addressing just funny you said a few people its one video and even disney world
gets bad reviews. I don't know what you may have searched. Their has been one person who made

a youtube video on me on the contrary as I just said. Who actually if you do watch the video said they did receive their billboard. But did call me a fraud in web 3. To that I will tell you the person who made that video was supposed to go on an launch pad on a reputable Solana platform but failed to fully dox their full team. I did marketing for that person but halted once I addressed errors in their smart contract. The errors in the smart contract would of made it where if you minted the NFT you would of lost all of the funds in your crypto wallet. After the fact I said hey , I need the team to be fully doxed besides oazzie. Which the team was made up of about 5 individuals none listed on the site and we need to redo the smart contract and have it audited they failed to have a real auditor and didn't want to launch. You only see one side of a story of me making a sale and fake telegram messages no zoom call meetings where most convos took place or ig messages. None the less the person who made the video you are referring to even stated they had actually received the billboard itself and a youtube campaign which boosted the server to 5,000 members on discord . but was upset with crypto marketing and that was the reason. I made an alert on community telling them not to mint they where mad because they failed to provide what was asked for and never went on the magic eden launch pad because failed to have proper audits and dox the actual team. The project also pushed back their launch date etc many times where they ended up launching in a bear market no marketing on the planet could of helped that. As far as my only fans marketing I am more than happy to show you the girls I manage and results on a zoom and we can use any trusted middle man on site for a billboard. I wont address this video again but now but I am very open with whats out their on the web.

The video was also botted fake views , likes, and comments by the owner all arab comments etc except jordan welch who hates me because I am associated with Top G he made a hit piece on him.

"Rug Pullers" mad I didn't help them with a rug and I told my youtube community of 60k to not mint a scam and Im taking heat for it is so sad. They made a video bought a site on my name one person. It is what it is. any concerns like I said we can use any trusted mm.

also you can't pay top g for a vouch or a testimonial. I did his billboard in times squares which he talked about on his very first episode on rumble.Followed by many of his other associates on my Instagram for a reason.

Trying my best to make hf great again. With real services and not shitty ebooks in a bear market

noone will buy any of ur services as long as a few people are outright claiming you have scammed someone.

it also doesnt help that your explanation of how those claims are false is longer than your entire sales posts.

im interested but you need to get this cleared up and if it really isnt a scam get those people who outted you to delete or retract their statements.
