Hello, today I am offering a Twitch Prime Sub Service.

Sub prices do scale depending on amount you want.

I also sell affiliate accounts [\$15] so YOU can start earning from Twitch TODAY!

Prices are paid in Crypto to regular users and Paypal {F&F} for trusted. [prefer crypto]

Prices: \$0.65 per subscription.

Shoot me a message and a contract for a vouch copy and I'll send you a sub!

Potentially interested in subs to unlock max emote slots for affiliates but I have a few questions.

How much for 50 subs?

Do you offer drip service?

Are you subbing from the same or unique IPs?

What is the payout average from your subs and has there been any issues?

Does it matter if I have low viewer count, say only a couple?

Do I count as trusted for PayPal payment? Been on HF since 2014.

Interested in these questions. Also interested in subs

32.5 for 59 subs

I do offer Drip Service.

Yes unique IP.

All depends on how often you stream. If you stream 4-5-6 hours a day everyday it's very likely the subs stick. If you stream 4-5-6 hours a week, it's unlikely.

I would recommend higher view count.

Not a fan of Paypal.

What region(s) are they from? I've had some prime subs pay out as low as \$1.15 from "cheaper" regions
