A man can dream, I guess!?

But on a serious note, yes you can easily climb the leaderboard with this even if your bronze.

What do you mean? It's by the scripting community in general.

It's based off of community perception and opinion. No there was no poll made, I thought that was obvious....

The -3 seems harsh for a basic question, based on a postulate you gave.

When you say it's the top rated script, and I ask nicely to see those ratings, don't go full temper tantrum.

The -3 is because you seem like an idiot if you think the scripting community gathered everyone and created a poll to find the long lost question.

Ask people in the community what script they recommend and see what they suggest, that's where the #1 Script comes from. Now get the fuck outa my thread before I lose another brain cell

But there are plenty of polls where people are asked what their favorite script is. You should be able to show me at least one where yours is the top pick, since you're certain you'd get enough votes to be named "#1 script".

I'm not linking to other forums, but it's literally one of the most asked questions on video game cheat forums.

And no, I'm not sales trashing by asking questions.

You won't get far if you're a literal iron/bronze player. Mechanics are only one part of the game. If you're not careful it'll be too obvious and you'll get banned. Well probably not cause Riot are incompetent fucks and support does fuck all. If you want a rank you're better off getting an elo boost.

Scripting can easily take you to plat with no game knowledge. Especially since you aren't focusing on improving your game mechanics you end up defaulting to improve your game knowledge even if you like it or not. Elo boosting can also get you banned probably imo at a higher chance than a

quality script as Riot is taking that hard now a days and not only that if you communicate LoL to anyone and you were Elo boosted they will know right away. Instead when you are scripting, you can easily communicate and understand whatever rank you make it by scripting.

This season alone I made it to GM scripting with Zenbot FYI.

Riot doesn't do shit about boosting. There's Yuumi egirl accounts with 70+ wr on kha talon in masters. Win trading is rampant in high elo. I've elo boosted and so have my friends, nobody gets banned for it. And if someone was so paranoid about getting banned they can purchase a duo boost instead.

You can get people using bottled accounts banned by making a ticket. And if you're playing in iron-plat 85% of accounts are bottled.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
