Thread: [Give me a lovetap and I will send you a key for a random game on steam](#)

Airbourne - November 23, 2022, 12:23 pm

First 50 people who love tap me get a key. Post below and I will DM you the key. Games range from small indie titles to several AAA titles.

Quick edit: People who quick loved so far got their keys.

From the point of this edit I might not be able to give out keys quickly so if you QL and comment but get no DM then just give me some time because I'm tripping and going to lie down. I'll give the keys away once I'm back

I'm not sure what a love tap is? Is that like a QL?

Enjoy your game and thanks, I had to find the proper place where I can manually enter the recipient of a message due to you not posting earlier. Such a hidden feature.

Keys sent out. Closing for now as I didn't think to note which keys Ive sent out already and I don't remember what I did yesterday or who got what.
