Looking back, typically nothing

I've heard talk of intermittent fasting improving focus and I do notice that I'm more alert on an empty stomach

I also like caffeine in seltzer water (e.g. AHA or Bubbly Bounce) to lock-in and hydrate

M&Ms, the ultimate snack.

????? - November 26, 2022, 8:55 pm

Oreos, Weed, Doritos, charcuterie boards.

I'm pretty snacky quite often too.

StuffSneak - November 26, 2022, 9:04 pm

I don't hack much anymore but I do snack a lot. Fav being finger dishes and fruits.

After seeing the Hack sections became ghost sections, I forgot for a while that this forum used to be a place where people in hacking realm hang out.

It's bread with coffee for me.

Based on what I have seen here, not many hackers here.

To answer the question though, if I am hacking I am usually not eating anything

I have similar preferences, I like to enjoy pure whiskey with ice during my "wanderings" through the depths of the Internet.

But not too much so as not to obscure the clarity of thinking?

If you can consider hacking as just executing downloaded software then doritos and mountain dew.

I wonder of North Korean nation state hacker mercenaries snack while working? I can't see it.

z x v - November 27, 2022, 6:57 pm

paimonia_87 - November 27, 2022, 8:26 pm

not hacking in particular, but just internet browsing in general I need a lot of caffeine to keep me up late hours of the night online, so naturally energy drinks like gfuel or monster is what I "snack" on...

I don't hack but I used to use munch on Pringles but not anymore as they got expensive as heck now.

Lyralei - December 8, 2022, 9:34 pm

Snacks? Apples are nice. If it's junk food snacks, then I like "snacking" on energy drinks. I also like

chocolate, but I try to avoid it as much as possible.
