Thread: [\[CSGO\] M4A4 or M4A1-S ?](#)

So since the last nerf to the a1s, which one are you using primarily?

I still use the a1s as it just feels super satisfying using the silenced gun. And no tracers make it a good long range weapon as well. Sometimes even if you miss, enemy can't pinpoint where the shots came from.

Have you switched to a4 already?

HighJawa - November 28, 2022, 3:00 am

Always used the A4. The a1s just doesn't do enough dps for me

You were using a4 even when when a1s had 25 bullets and buff?

pms - November 28, 2022, 5:58 am

Dont play anymore but when i did it was always the M4A1-S.

Nice. a1s gang.

When I switched, I just couldn't go back.

Yeah I just don't get the satisfaction with the a4 while tapping.

(Nov 28, 2022 07:47 AM)vvvvvvvvvb Wrote: [\[CITE\]](#) They nerfed the damage, armor pen, and effective range as well iirc.

I think they only nerfed the long range damage/pen?

StuffSneak - November 28, 2022, 6:58 am

(Nov 28, 2022 07:49 AM)vvvvvvvvvb Wrote: [\[CITE\]](#) Could be, mag capacity was definitely decreased though

Yeah. That didn't matter much for me. Only at long range you need 1 more bullet now.

How do you feel about the awp 5 bullets. I keep forgetting to reload lmao.

?

Good that you accept it and don't try to use it if you can't. There are so many Kenni X in the scene.

Sign of a true teammate ?

Respect.

I lean to the silenced ones more , it's more accurate for me

It does indeed. I think both of them have same accuracy however the pointy silencer and no sound makes it feel like more accurate.

Also its less bulk to hold so you have little more screen space.

hamradiatorer - December 4, 2022, 7:17 am

I like to play with the silencer more, just because of the sound satisfaction that it gives me. Also it feels like the recoil is easier to control.

Agreed. It does seem sometimes is more accurate due to that.

Smexy - December 4, 2022, 7:41 am

m4a4 is currently better in my opinion, since the silenced one got nerfed.
I do like the way the silenced one shoots and it was really good in CS1.6

MightyOne - December 4, 2022, 2:25 pm

I used to play A1-s for ages until I got my dope ass M4A4 Hellfire skin, then switched to it and never got back since lmfao.

I don't play that much nowadays but if I'll log I'll stick with M4A4 atm

SetLost - December 4, 2022, 6:22 pm

Very nice collection indeed. I also own a few play skins. Its much better to play with skins than playing with default ones.

Definitely! the skins really upgraded the game.

Meeting some rare skins on the field from dead players is also super fun!

Shrooms - December 6, 2022, 2:49 pm

Used silenced when I first started but non-silenced is just better
