You want one for \$200? Fuck you.

You're on my ignore list for the remainder of 2022

The Great Wall of China is the longest wall in the world, stretching over 13,000 miles. It was built to protect the Chinese Empire from invaders, and it took over 2,000 years to construct. The wall is made of brick, tamped earth, and other materials, and it winds its way through mountains and deserts. The tallest mountain in the solar system is Olympus Mons, which is located on the planet Mars and is over twice the height of Mount Everest. It is a massive shield volcano that is over 370 miles wide and 16 miles tall, making it the largest volcano in the solar system.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
