Hey guys, haven't been around these forums in awhile.. I like to see that e-whoring hasn't completely dwindled away.

I used to post pretty regularly in these parts, offering help or even live-streaming doing it.. - has anyone experimented with this recently? Is it still viable?

Trying to get into it again, but want to make sure I'm not using old methods.. so any knowledge and/or packs would help tremendously.

Anyways, I'll probably see you guys around!

Go into snap [BRAND NAME REMOVED] and other apps , or use Reddit

There are fairly new techniques shared around in this section. Few people are also selling auto traffic bots for ewhoring and stuff. You might want to check that as well.

no one talks about seeking ever on here.. when were you doing seeking?? there was a big scene for [BRAND NAME REMOVED] 2 years ago but it got harder and now the scene is pretty dead... seeking sounds like a good idea tbh but you should prob keep it to yourself
