Thread: [October Fest Pint Award Sprite Error](#)

Dredd - December 9, 2022, 6:20 am

The pint award sprite has a strange white line below it I've updated the sprite to remove the weird white dots not sure if this was intentional I thought it was a glitch.

BEFORE:

AFTER:

I've uploaded the new sprite here with the glitch removed and no compression not sure if this helps.

Kind Regards,
Dredd

Cooligan - December 9, 2022, 7:18 am

Great work OP, it looks much cleaner without the little white line below it.

Also I couldn't help but wonder and explore but, what did I stumble upon here [Dredd](#) lol?

Cheers bro,

Haha it was a project I was working on ages ago it's my go-to screenshot tool

<https://hackforums.net/showthread.php?tid=6228470>

It works the same as Gyazo just with more features and designed for HF use in mind. ?

Ahh gotcha lol, just checked out the thread. Really neat project my man.

I thought I found a secret for a second though ?

Omniscient - December 9, 2022, 10:43 am

It is overflow spilled beer foam. You really want it removed?

DashPHP - December 9, 2022, 11:32 am

Yeah it's too much of a straight line to look like that, defoo remove it.

pms - December 9, 2022, 11:43 am

(Dec 9, 2022 11:43 AM)Admin Wrote: [\[CITE\]](#) It is overflow spilled beer foam. You really want it removed?

Haha yeah i thought that's what it was.

Blazin - December 9, 2022, 11:49 am

As admin said it was never a glitch. Purposely made like that to show overfill/foam you guys really be pocket-pixel watching, lol.

IMO, if it really bothers you that much, your doctor can fix that problem of yours with pills, (OCD) I don't mind it either way.... personally.

Zexo - December 9, 2022, 12:43 pm

Ya def didn't like the line for it. Wasn't going to get it but nix copped it for me.

Komodo - December 9, 2022, 1:18 pm

(Dec 9, 2022 11:43 AM)Admin Wrote: [\[CITE\]](#) It is overflow spilled beer foam. You really want it removed?

[Dredd](#) you have to Zamboni the spillage for calling out Admin like that.

jcole - December 9, 2022, 2:18 pm

Line doesn't bother me at all, like [Blazin](#) said that's super critical of people to be upset about something so miniscule

Yin Yang - December 9, 2022, 2:54 pm

Damn I could hardly tell and I'm on mobile. When you zoomed on it, I thought it was a coaster lmao

Blazin - December 9, 2022, 3:06 pm

(Dec 9, 2022 01:34 PM)xadamxk Wrote: [\[CITE\]](#) It looks like a smudge.

When it was released everyone was complaining about it.

I didn't know 3 or 4 people consist of everyone, could of fooled me. Like I said. They make pills for being upset over something so irrelevant

But maybe that's just me. Smudges / lines don't bother me. I would be happy with either of the images. Smudges in pixels don't bother me personally.

You know what now you mention it I can see it but I never once guessed it was foam I genuinely thought it was just a couple of pixels off that were missed.

To everyone else I wasn't being picky, nor was I upset not sure why it's caused such a debate.

(Dec 9, 2022 02:18 PM)Komodo Wrote: [\[CITE\]](#) [Dredd](#) you have to Zamboni the spillage for calling out Admin like that.

Yeah man I feel bad now I never would have guessed in a million years that it was foam. I'm a massive beer drinker as well ?

jcole - December 9, 2022, 6:18 pm

(Dec 9, 2022 03:39 PM)xadamxk Wrote: [\[CITE\]](#) You can not honestly look at that award next to other awards and say it compares in quality in any way.

I understand how it can bother other people, but not so much for me

Imagine you make a post and people agree with you but others can't stand that you have an opinion that differs from theirs.

I agree with Adam

iNviZ - December 10, 2022, 7:23 am

It's a full mug, gives it character as to slamming a good ole beer on the counter just filled on tap. Cool award. I like it.

?nxy - December 10, 2022, 2:20 pm

I've gotta say

Hate the line at the bottom of the pint

Confound - December 11, 2022, 8:27 am

Nice dude, this is quick little helpful fix that I'm sure is greatly appreciated by many.

Thanks so much for the high-quality post robot friend, please take the time to read my plethoric high-quality response, goodbye.

Thanks all for your replies, turns out it was intentional not a glitch I think the line is here to stay.
