Thread: [Paying for Ads, Stickies with CC?](#)

Soronrheeyi - December 9, 2022, 3:07 pm

Hey all,

Does anyone know if there is a way to pay for ads and whatnot here with a CC. My only option looks to be crypto

webdev77 - December 9, 2022, 3:35 pm

Quote:Payment Types

We currently only accept cryptos for advertising. A number of options are available and include but are not limited to BTC, ETH, DASH, XMR, LTC, and BCH.

<https://hackforums.net/misc.php?action=help&hid=25>

Unless something has changed, the written policy states crypto only.

Alright, thanks for the tip. I'll convert some cash

From what I remember there was a lot of fraud and chargebacks involved last time HF accepted credit cards. Just not safe for Admin.

Omniscient - December 9, 2022, 7:33 pm

Sorry, I could go into a long explanation on this but end result is that I'm not accepting CC's for advertising. There is only 1 thing you can buy with CC on HF and that's a L33t Upgrade.

If you're on HF you should get comfy with crypto. Is there a particular reason you're not able to pay with crypto?

HF has a lot of ads in reasonable price ranges like \$10-\$25.

Yeah, and I do have some crypto, but I have it stored as \$ryo and I need jump through hoops transferring to tradeogre then exchanging to BTC. No biggie... I do it more and more these days. I'll get on it.

You can easily exchange here, would take just a few min to get the crypto you needed

I bet if you talk to one of the exchangers on here you can send them PP or Cash App in exchange for buying the advertisement you want.

Wait, is it possible to buy BTC here with a CC and avoid exchanges and fees? How does the cost compare to buying via coinbase, et.al?

How is the service vouched for? What is the guarantee to the buyer that their data isn't being leaked, or otherwise compromised? Is there a rating system or something? What cryptos are supported?

If you can find someone who's willing to take cc, go post in the currency exchange section or use search

Nice! Will do. Apparently there are several here in very good, like, trusted and rated standing that will accept various forms of payment to convert to BTC at roughly the standard exchange rate but without the pesky KYC id checks. Many use some sort of escrow... I'd ask for that...

I also found a few within my own little group who will do the same for me and I have legacy trust with them, so I'll go that route.
