I'd be interested in a vouch copy. I can make a review. I'm not super reputable or anything but I can surely put it to the test. [warn]

Dming you now aswell.

Polymorph - December 16, 2022, 9:05 am

Received a vouch copy. So far there are two options, a gradual increase in viewers and an instant one. Tested both and they work flawlessly. You can set for example you want 100 viewers and you want them all to drip feed in within 30 min, or 35 viewers drip feed in over 15 min, very

customization. The instant viewer option arrives basically instantly as expected, went from 0 to 75 viewers in a minute or so. The website dashboard itself is very easy to use and navigate, just a bit incomplete, but the functionality is 100% there. I kept a stream on for an hour and through multiple different tests, the viewers didn't drop. Very much looking forward to the chatters feature and followers features, this product has my vouch.

We are still working on the UI of the site to make it even better and working on developing the chatters and followers.

2/2 100 viewers weekly vouch copies gone.

I received the vouch copy and there was a bug with my account which was quickly resolved.

This service is working amazingly well on the 30 minute drip feed and the instant viewers as well, would be personally purchasing this to use for my future streams as well.

EDIT: This ended up only actually working twice in a week, most of the time it was not working was when support said everything was fine on their end and was the proxies fault, nevertheless their support is quick to respond to try and resolve the issues at hand, the views did fluctuate a lot, with some work and stabilisation this could be really really good at the price.

SuperiorUser - December 21, 2022, 9:52 am

Just used this service for the first time, here is my review:

Pros:

very cheap compared to other services

ability to control views is a huge feature that I haven't seen on other services

the website design is very good.

Cons:

A huge issue I had with the service is the viewer count was certainly not stable, I went from 300 to 20 back to 200 in the span of 5 minutes, the issue kept occurring throughout the 3 hour stream.

Unfortunately I couldn't comment on the followers/chatters as this feature is still not implemented however I was certainly looking forward for that.

Lastly controlling the viewer count on the website also seemed to be a challenge, fluctuations were massive and even when the bot was set to only use 80 bots, I had well over 100 for quite a long time.

Last but not least, this seems to be an embed view bot, which does get a little funky as I'm pretty sure that doesn't count for ads.

overall 6/10 review from me, with the addition of the chat bot and more stability for the view bot I would probably rate this a 9/10. Huge potential for the product.

Update 1: After 24 hours of my purchase it seems that the bot has actually became ALOT worse. not sure if everything is down for maintenance but only a small percentage of the viewers are still alive. approximately 15% out of the 200 are able to connect. will keep the thread updated.

Update 2: bot seems to be completely down, 0 viewers joined, although I might have something to do with killing it by trying over and over again to get bots to stabilize

Update 3: This will likely be one of the final updates from me on this thread,

Here is the run down and tl;dr: Long story short the service is incredibly inexpensive, the customer service is actually really damn well and probably the best i've seen for any similar websites (There was constant active staff to respond and help). They seem to be having a few issues with connections however according to their support, those issues are being resolved as of today. Lastly, I believe if the prices are able to remain the same with the addition of the chatbot, this will literally be a game changer. This service is 100% the most trustworthy I've used. And last but not least, it's clearly a newer product launching and as someone who has launched similar websites, I cannot stress enough how well this is being executed.

My last statement specifically to the owner of the website is going to be some 3rd party authenticating that all of the data being stored is secure (nothing in clear text). Besides that, great job overall and I'm looking forward for future updates.

Besides that, great job overall and I'm looking forward for future updates. Thank you very much for your review, it's incredibly informative and helpful for us to hear the exacts of your experience with us. We are indeed a new company and sadly (although we hoped there wouldnt be) there have been a lot of ups and downs, we've had one proxy provider bail on us, and hideous inconsistency from another. Regarding your issue with 0 viewers this would have occurred when our balance ran to 0 with them without us being notified (was a kick in the ass) but we've since then corrected this of course.

Aside all of the above, the light at the end of the tunnel is we've hopefully now managed to secure a deal with a new provider which can meet our standards of stability, security and consistency that we wish to be delivering to our customers. For this reason id absolutely love to extend your package with us upon us entering into our new agreement with our new provider to experience the potential of the technology we have managed to create behind the bot itself.

I'm extremely glad to hear you were happy with the support provided as this is something that we care about massively, customer priority and satisfaction is key, and to hear you were happy with this is fantastic, although the issues you were facing were more than understandably beyond dissatisfactory we will make absolutely sure these issues will be addressed, as this is not the type of service we're setting out to be and have our name recognised with. More than anything i do not want our service to be leaving a sour taste in your mouth at all, and id love to have you back as a

customer again. If you'd do us the kindness of giving us another chance once we've managed to iron out our kinks and get ourselves firmly on our feet, again, I'd love to renew your package for free so you can experience our service again at its fullest and finest.

Please do let me know about the afore mentioned in either DM or live support chat onsite, ill be eagerly awaiting hearing from you.

Thank you again for your honesty and feedback in this review, it is much appreciated and helps us to better our service immensely.

Question in regard to the services. Do you have scaling? Lets say I want 5-7 viewers instead of 25 flat, does that work?

yep, if you purchase a 25 viewer plan you can control from 0-25 viewers although numbers might fluctuate slightly, it's also great to update in real time throughout the stream especially as you're winding down or going afk for a bit.

Like SuperiorUser said above, you can select as many viewers as you want upto the max your plan allows. So, yes, you can choose 5-7 viewers instead of 25 aswell.

If I'm trusted enough I'd like to try the week viewer package vouch

Stanley - January 10, 2023, 12:54 pm

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first

post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
