Thread: [Corrupt archive after crypting?](#)

SIM-23882 - December 15, 2022, 7:30 am

Hey never had this issue before but after crypting my file and downloading the .zip on my VM it's coming up as corroupt when extracting, but the same exe downloads on its own just fine.

Any tips thanks

Hi there

What is your used encryption algorithms, ciphers or archivers softwares and so VM file transfer protocols of your using now? we need to know for answer it

Maybe the problem is on file transfer protocol and what is file stream way

Best Regards

hey bud, im using pure cryter with advanced runtime,loader mode, execution delay ,and pumping to 301.. i usually have no issues.

uploading to my web hosting, when i upload the .exe its fine but when i zip it its corrupt.
same with winrar or winzip using .zip

Hi there

You need to check md5 checksum signatures of your files, if they're different problem is on web hosting, because there are gzip compression layer for optimizing web site on Apache. You can change that setting on cPanel.

You need to add this lines of your .htaccess file

```
Code SetOutputFilter DEFLATE
SetEnvIfNoCase Request_URI \.(?:gif|jpe?g|png)$ no-gzip dont-vary
SetEnvIfNoCase Request_URI \.(?:exe|t?gz|zip|bz2|sit|rar)$ no-gzip dont-vary
SetEnvIfNoCase Request_URI \.pdf$ no-gzip dont-vary
SetEnvIfNoCase Request_URI \.avi$ no-gzip dont-vary
SetEnvIfNoCase Request_URI \.mov$ no-gzip dont-vary
SetEnvIfNoCase Request_URI \.mp3$ no-gzip dont-vary
SetEnvIfNoCase Request_URI \.mp4$ no-gzip dont-vary
```

SetEnvIfNoCase Request_URI \.rm\$ no-gzip dont-vary
