[INTRODUCTION]

Hey! My name is C17H18F3NO but you can call me fluox, i have been doing GFX here and there for a year or so now and can make some basic signatures, so i am offering them to you guys.

[HOW TO GET THIS SERVICE]

To grab your own free signature please reply to the thread below and i will PM you once i have finished; if i don't get around to you i am sorry.

If you reply to the thread and don't hear back from me in a week please PM me and i will get it started but until then please refrain from PM me for the free service.

You don't have to worry about having L33T Or UB3R. Just comment below what you would like on your signature and i will get to it the second i can!

["Payment"]

Don't worry, it cost nothing money wise but if you could please leave a vouch on the thread after you get your signature that would be greatly appreciated! Thank you so much in advance! ?

I'm so sorry but this has stumped me, i have no idea what i could make from a molegrip; i spent about an hour trying different things and none of them work.

I really do apologise.

I dont need a signature done but Im starting to like your work mate. I think you should start offering a service for thread designs.

Thank you! I have never really worked on thread designs but I could always give them a go and offer a service for them when I am more comfortable. ?
