Thread: [Recommend me a good crypter for async](#)

RobinHood - December 20, 2022, 10:39 am

any fud crypter going good with async lately?

Astonished - December 20, 2022, 12:04 pm

From what I've heard its become a little more difficult to keep async FUD for much time, seeing as its been released for such a long time and so, so many people use it that don't have the funds to invest. I used a crypter from PureCoder back in the day and it worked well for me then, unsure if he still provides that service as I do not find interest in this kind of activity any longer but I'd recommend looking around for that!

well not really i tried every single rat and till now found nothing good async is doing actually better than warzone the paid rat.

im still searching for a good rat though

I didn't say async was a bad RAT, I said it is difficult to keep FUD/Crypted for a decent period of time. You'll end up having to crypt a new stub over and over again. Thats just my experience with it, unless people have released some custom plugins for it, its no longer updated and is completely detected without a decent crypt as thousands of people have used it.

any suggestion about different good rats then?

Stack-Terrorist - January 2, 2023, 9:07 am

try # or venom they are updated it i believe

slicerAD - January 4, 2023, 2:30 am

I can offer to try out my crypter and give you a free crypt.

Just send me a PM.

Please leave a short review afterwards.
