Thread: [Amazon Prime Gaming to get free games and in-game rewards](#)

elkaa - December 21, 2022, 12:07 pm

How to use Amazon Prime Gaming to get free games and in-game rewards?

1.Go to the official website by clicking this link: <https://gaming.amazon.com>.

Amazon Prime Gaming India

2.Get started by logging into your Amazon Prime account. Those who aren't already Prime members can get a free trial by clicking the button that says "Try Prime" in the upper right corner.

3.After logging in, click the "Activate Prime Gaming" button in the upper right corner.

Activate Prime Gaming

4.Click the "Get in-game content" button, then click "Claim" that appears under a Game, and then follow the on-screen instructions to claim in-game rewards.

5.Linking your game client account with Prime Gaming is required in order to access certain in-game rewards and games. To redeem Quake, for example, you must link your Epic Games account to prime gaming.

6.The full game or in-game reward will appear in your gaming client once you have linked successfully.

In order to access some of the claimed games (for example Brothers game), Windows PC users will need to install the free Amazon Games app (<https://download.amazongames.com>).

So I'm guessing because of the location it doesn't ask for all the extra stuff?
