Thread: [\(1:1*\)Selling BTC need \\$250 Amazon Gift \(lowest exchange rate in history\)](#)

Exgroyper - December 26, 2022, 3:34 am

I need \$250 on Amazon Gift card in exchange for BTC. Rates as followed:

1:1 if you go to a store, buy the card then send both sides of the receipt and card to me no fee. If the receipt clearly shows you paid in cash and you write your HF handle on the back of said receipt I will PAY YOU a 5% fee.

If you email the gift card to me, get it somewhere else, etc, it's going to be 10% rate from you to me for the exchange.

If these cards end up being fraudulent I promise to dispute, open scam report, work with Amazon to unmask you incase they want to pursue legal action, but also with that info I will make a police report against you in your home county! If it is fraudulent and my account gets banned i promise to see you in small claims court!

Will be using a contract and an official midden man from here we both agree on (Prefer to split fees but I'm not nickeling and dimming, so I can pay their fee.) I don't mind and will still leave 5/5 vouches regardless but I probably will blacklist you from deals with me after this.

You can't be as new as me. Prefer Ubers with lots of completed contacts (rate is possibly 1:1 if you are an active trader, etc. But this is at my discretion). If something seems off I have the right to cancel anytime before payment is sent and Gc received. We will use a middleman unless it's rare circumstances. Thanks!

(P.S. I hope this is the right section admin man since it didn't let me make a thread there. If it isn't please move where I should have done this and it won't happen again:)
