Thread: [Help: How to multi quote on iPhone Safari + can I reopen closed threads as a l33t](#)

Exgroyper - December 28, 2022, 12:46 am

I know it doesn't make sense to post this here but im too newb to find the site help forum. New kid on the block not as tech savvy as I thought haha.

So it's basically impossible for me multi quote on my phone. just click the "multi quote" button next to each persons comment, the button next to "quote reply", I wish it would auto populate in the reply box when I hit it but I'm no coder. So after I click them all (only 1 page) I hit the quote reply button. Sometimes it will give me 2-3 replies to quote but I want to do it for four people lmao. I know I'm 100% retarded and probably missing something blatantly obvious I have given up after 20 minutes lmao. If you can help I'll pay you back with my undying love and support. Thanks!

2nd. If I close a thread because I don't need more people right now and don't want people to reply until I'm prepared to hire more so there is less FOMO, will I be able to reopen it to replies once closed by me? Wouldn't close if longer than 7 days unless the thread is done. If not can Ubers do that, or admins only?

Bonus question can I disable my PM box and reopen it when I'm online? Disable as in people can't message me, either there is no option or an error telling them it is closed right now. There is no logical reason I want to be able to do it other than to make it more clear if I'm active at that moment so no feelings are hurt when I don't reply within 24hrs

Idk if I'm allowed to bribe people for help here (if not disregard) but if I can I offer by remaining block chain wallet which is like \$3.xx or \$2 PayPal lol if you can help with all three 60 IQ questions. Thanks friends.
