What does your mug look like?

Smexy - January 6, 2023, 2:49 pm

Thanks, I have glass mugs that don't really look like anything.

Also: use the i.imgur link, that should work.

Yeah, but I'll bet they get dirty with coffee, or juice or water or something. Ok, thx for the tip. I'm not getting it to work.

Your tea mug looks like it has been around for a few decades.

I don't understand. Why is the mug so filthy? Why are people not washing their mugs after coffee?

Same same. I'm pretty sure this is how I was able to avoid covid. I mean, if this cup can't kill me, no bug will.

You shouldn't understand it. I am just gross. I'll go like a week between washing my tea mug. This isn't recommended (but still, delicious)
