Why did you close and remake the same exact thread within 4 days?

Just noticed this too ?

Edit; if/when OP approves me I'll post an update.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,  
Stanley

Was it the same of just the same website? The provider offers many cheats and a spoofer as well. Not just Rust.

Edit: Yeah it is the same dunno why. This is odd, maybe he couldn't bump?

The best fucking cheat in the whole market!!!

I've been using this cheat for almost 15 days now, I got around 130 hours on my new cheat account and I still didn't even get a warning or server ban.

I've been using aimbot, esp, radar, and admin plugin to fly around and see bases from inside (noclip)

and nobody even called me a cheater! I used very legit settings on his private cheat.

I'm going to repurchase it for 1 month this time!

also, the seller is a cool and chill guy, he can help you with everything.

cheat GUI: 10/10

cheat plugins: 10/10

detection rate: 0/10

legit/rage hacking can both be used

overall: 10/10

I tested also evi\*lcheat and some other cheat providers, my account got banned the next day lol even though I only used esp.

(Jul 27, 2023 02:48 PM)dolores Wrote: [\[CITE\]](#) I purchased 2x 3 month licenses for their fortnite aimbo and their products are not working and they have scammed me, i'm unable to create a scam report in the usual section for some reason so i'm posting how they handled the situation here:

I paid for their fortnite aimbot, which 90% of features did not work, if not 100% for most of the time. I have tried to come to an amicable agreement with velocity about refund or just fixing the product and compensating. What they instead do is instigate and ridicule the issue I bring up every time and refuse to provide support or clarification on any issues. Furthermore, they have others in the chat seemingly jump to their rescue in their general chat when I bring up valid concerns such as the fact that the aimbot is 100% nonfunctional for months at a time. They ALSO deleted my feedback review with an update on their discord channel which is why I felt the need to come to other communities such as this to provide a community alert in case anybody is considering spending their money here before they rectify these flaws.

Proof such as chat logs, account link, payments (censor private information!)

"My Support Ticket Conversation" [\(Click to View\)](#)

"General Chat Conversation #1 in their general discord about situation" [\(Click to View\)](#)

They claimed to have "updated" and are refusing to refund or compensate at this point as seen above.

"General Chat Conversation #2 with staff in their general discord about situation" ([Click to View](#))

Proof that they are aware of the downtime, are refusing to compensate or refund (They claim they cannot verify when the downtime started so they cannot determine how much compensation to give me, however they already admitted to the downtime and know when it is from both my support ticket as well as other members of the general chat voicing concerns).

tl;dr I paid for 2 of their most expensive licenses, and received a non working product which they currently have not compensated, refunded, or fixed the product all while they have their staff ridicule the situation and ignore my concerns.

OP has been fully refunded.

Having the same issue with the hack i bought of them.

Purchased 30 day Rust key, did everything they wanted to take before injecting. A Extra window appeared with the Menu inside but thats it.

None of the function's were working. Tried every single option but nothing.

I decided to contact the support and ask why it dosen't work. After they updated the cheat they told me to try again. I loaded back in just to see i'm banned from rust, even with thier spoofer active. I've been in game for like 5 Minutes doing nothing, because still none of thier functions were working.

They asked me to show every single step i did for making sure everything is setup correctly ( via Screenshots ).

After i sent them all they wanted, they stopped answering in my ticket. No response at all. They just ignored my question for refund.

Well, just as the user above have told, they did almost the same to me.

I really would not recommend to buy from these guys. Its more or less a scam.

Spoofers Detected, Cheat Detected.

From the reviews so far it seems that you are scamming people, you need to resell a better cheat because whoever you're an affiliate for now is letting you down lol.

Hello, we're not sure what you're referring to. It's possible you've confused us with a different entity called Velocity:

We are the original sellers, not resellers.  
We have been active in this market since late 2018.

Best regards!
