There is a regular, l33t,ub3r tier, why not a v3ndor tier so people can quickly see who's a v3ndor

Mainly because Vendor is a secondary group. Also I think it might send a message that the group convo is for Marketplace activity and I don't want that.

True I feel like it would bring up hella confusion too especially for new users etc.

You can already see by Display Group that someone is waving their Vendor.
