Strong contender for a top 3. Assuming you used a wizard of some sort? It's still pretty good. Nice job.

Thought I was watching a movie recapped there for a second.

Thank you! No sir, all on Final Cut Pro with some stock elements and lots of editing. The voiceover is AI generated with my own script though as I felt my voice would be too British and unpolished, but I might do another in a different style if that would be allowed?

Thank you! I used to work a lot in smaller film and TV productions before covid, so thought those skills could transfer to here. Really appreciate the kind words!

Really like this promo video - smart move with the QR referral plug at the end.

Thank you! I was a cameraman mostly for a lot of productions and edited for broadcast or festival entries, and as a side job I always did graphics or visual art for other things. I've since segued into marketing and work for a company doing that pretty much full time, but my real passion is film/TV so I want to get back into that at some point.

Just coming back to this thread and post because I saw that there's potentially a new award about referrals, so definitely gonna plug it more in future videos if I decide to do any.

I really liked it, it shows this isn't some website dedicated to hacking others. We have such a variety of information to offer here.

I really appreciate it, thank you! I wanted it to be a kind of advert for the concept of HF so people with no real experience of the site can get a more rounded idea of what there is to offer :)
