Thread: [MAKE \\$2000 + PER DAY WITH CS:GO \[PAYOUT IN CRYPTO\]](#)

Sectumsempra - January 24, 2023, 2:19 am

Looking to sell you a method that will help you make over \$2000 per day with CS:GO.

For this method to work you will need:

- Steam account with CS:GO
- Steam Guard enabled (so you can trade)
- 200\$ investment +

So basically with \$200 investment you will be able to make skins worth \$1000+ per day, that you can sell after 7 days for 850-900\$

With higher investment you can earn even more.

You can also work with RUST items (but you will be able to gain less skins) but on the other side Rust items are tradeable instant.

Earnings with this method are guaranteed.

Can be done multiple times and I guarantee it won't get oatched in the next 2 weeks.

Selling the method for 250\$

If you can make 2000\$ a day what the point for you to sell it for 200 bucks ?

If you want to recover your loss from stake just use This method for 10 days and you will get your 20k back again ...

You really try to scam people for few bucks thats insane , i Hope nobody here will fall in your scam

HelloMyFriend - January 24, 2023, 4:12 am

Yet another magic money making method.

Such an obvious scam

Judging from this, your method evolves gambling to get better skins for flipping?

First of all you need over \$200 + which is something I dont have currently. I can show you my gambling losses recently are really heavy (i lost all the money I had)

If I had money trust me I wouldn't be wasting time arguing with people like you..

No gambling involved.

Deal with caution. Seller has created a lottery to pay for reputation+ and in the same time opened two threads to sell unbelievable money making guides.

It may be interesting to see what will happen once the end date of this lottery (31/1) is reached.

1 week is usually about the time the scammers need to get some victims and disappear.

We never know for sure but the flags are clearly red. If you fall for this you can only blame yourself.

I just got negged by some kids here so I did what everyone else is doing in this forum to make rep. I can provide all proof that my methods are legit and as I claim.

Alright but instead of keeping your money to one day get your 200\$ you prefer to offer a 25\$ giveaway. That's logic. ?

yes I needed to get rep because people like you gave me negative reputation, so I guessed that would be the easiest way ?

do you accepte mm until i get my first payout? after 7 days

Easiest way is to keep your money and collect step by step your 200\$ to get your 2k per day. it's obvious that you're looking to scam that's why i -rep you.

MM releases the funds once you obtain the skins. I will not wait the 7 days market hold for you to sell them.

The whole point of an MM holding the funds in this case would be so that the buyer can see a return before the funds are released to you, proving the method is legitimate, otherwise there's no real benefit to using them. If you're not scamming and are legitimate, you should be able to wait the 7 days without issue.

But why should I wait 7 days, the point of this method is to teach you how to get cheap skins. He can either sell them or keep them for himself after that,

Because the method is being advertised as being able to make \$2000 a day, not to just get cheap skins. If that's the case, you should take this down and restart the thread stating as such.

because i can get trading ban if the method is blackhat and the website report you so i will not be able to sel the skins and my account banned. and money for the method and investement gone :)

Yeah, I sell one more gambling account by the way. I gambled over 50k\$ in the last month and literally got 0\$ left. I'm not ashamed to confess this.

If I didn't gambled my money, I wouldn't be wasting my time here at all.

fsociety_ - January 26, 2023, 12:54 pm

DWC Guys, another user on a different forum posted a similar thread and he got banned for scamming. He also confessed he lost all his money recently. Just a dwc on this, be sure to use a MM and be sure to invest only if you're comfortable losing the amount.

liverenes - January 26, 2023, 12:56 pm

Guys, there you have the method.

It's scam 100%, he will give you his card supplier which is him and he will sell u a dead card

Method:

So basically for this method you will need Vanilla Gift Cards or Credit Cards

Than you will need to have a Steam account with trading enabled

The sites that you can use to cashout are these

skinport.com

daddyskins.com

cs.deals

cs.money

Basically if you can find account that has volume

in any of these sites

Orders/gambled there

Your limit will be higher

On skinport we managed to cashout \$10 000 with acc that had \$1300 in volume

With fresh accounts we only managed to do \$600- 1000 per account
