CUSTOM SIGNATURES

Hello everyone. Prior to our public announcement, we wanted to offer you a custom Gold Standard signature for the forum.

Here is an example of how it would look:

If you'd like one made, just send a reply below. Please specify if you would like it to look any different than your username (i.e all caps, lowercase etc.).

Thank you.

We are The Gold Standard.

I'd love to have one made. "pms" all lowercase. Thank you!

I've been rocking the unedited PSD, but would like to have a "jcole" one if you can. Thanks [theDuke](#)

Any chance I could have one with my name embossed with the same colors as the ribbon? Like it was metallic and stamped into the ribbon?

I think it's a little too big now that I look at it. I had to step out for a bit but will send another version shortly. Unless you think it's fine, then lmk.

I'm very happy for him overall and glad he is able to take some responsibilities away from Omni. I know TGS lives in his heart ?

Now how is it for things like browsing HF for example? Photos/videos? Social media apps all load fast and smooth?

Also most importantly; the UI is still basically flawless on an iPhone and feels smooth as can be when opening apps that aren't already running in the background?
