Thread: [How to get custom photos for snapchat use?](#)

stolickovystol - January 27, 2023, 4:42 am

Hi there guys!

Is there good way to send guy custom photo (for example - where girl show thumbs up, or middle finger) if he ask me to send it to him? I was thinking about finding those photos on google but it seems like really not efficient way. So iam asking if there is some page or program or something to get photos like this.

Second question i got: Is there way to send video on snapchat as snap? I know there is way for photos to send them as snap but i dont know any way how to send video as snap and not in chat.

Thanks for advices and answers!

Yes there is. You should search deeper...

Find a pack with verifications.

Those are called "verification pictures". You should get/buy a pack which has them.

I can provide you with that and real models who can do custom verification pictures/videos.

As for the snaps to appear as a snap not a vid, just send them without the sound

I recommend you to look around Reddit, Instagram for models. For a very good pack you need to pay I would say 100 bucks. That is the only way to avoid your pack getting saturated. Even if you fine a rare one or buy some off a buyer, there is no guarantee the customer has not seen it before or will not see it after he spends money.

Countless times I sold a model to a customer and 2 days later I had some explaining to do when he came across someone else with the same pack.
