Thread: [\[Lions League\] Hardware Hacking Tools - Top Hacking Devices - Beginner Friendly 2023](#)

flavoral - January 27, 2023, 9:39 am

? By xadamxk - 2023 ?

About

Every hacker should always have the right tool for the job and this list is guaranteed to meet your needs.

Whether you are new to security, or a seasoned veteran, the following devices would make a great addition to any hacker's toolbox.

If you find a tool that you love, but the price is out of your budget, research alternatives as most of these devices are open source.

Have any questions about the devices listed? Think your favorite tool should've made the list? Comment below!

[10. DSTIKE's WiFi Deauther](#)

Description: Disconnect 2.4G WiFi networks, create fake networks, display wifi traffic information, and more.

Manufacturer: [DSTIKE](#)

Models: MiNi V3 ([Official: \\$19](#), [Reseller: \\$24](#))

Monster V5 ([Official: \\$35](#))

OLED V6 ([Official: \\$29](#), [Reseller: \\$39](#))

Deauth Watch SE ([Official: \\$59](#), [Reseller: \\$59](#))

[9. CrazyRadio PA](#)

Description: Long range radio dongle for various wireless attacks (compatible with [JackIt](#), [KeyJack](#), [MouseJack](#), and [KeySniffer](#)).

Manufacturer: [Hacker Warehouse](#)

Models: CrazyRadio PA ([Official: \\$35](#), [Reseller: \\$44](#))

CrazyRadio PA 2.0 ([Official: \\$65](#))

[8. YARD Stick One](#)

Description: Transmit and receive wireless signals below 1Ghz using the same hardware as the IM-Me, which has been used to [hack garage doors and security gates](#) that do not use rolling codes.

Manufacturer: [GreatScottGadgets](#)

Models:YARD Stick One ([Official: \\$100](#), [Reseller: \\$100](#))

[7. Chameleon Mini](#)

Description: Read, clone, and manipulate NFC devices. Supports the open source [Chameleon Mini Firmware](#). Companion Android app [Chameleon](#).

Manufacturer: [Kasper & Oswald ISE](#)

Models:RevG Standard ([Official: €200](#))

Tiny Pro ([Official: \\$100](#))

[6. Bluetooth Sniffers](#)

Description: Capture BLE (Bluetooth) packets with Wireshark, replay messages for keyboards, mice, and other smart home applications (locks, alarm systems, etc).

Manufacturer: [GreatScottGadgets](#)

Models:Ubertooth One ([Reseller: \\$125](#), [Reseller: \\$160](#))

Bluefruit LE Sniffer ([Official: \\$25](#), [Reseller: \\$29](#))

[5. Proxmark 3](#)

Description: Read, sniff, and clone RF tags. Does not require a computer to use.

Manufacturer: [Hacker Warehouse](#)

Models:[Proxmark 3 X](#) ([Reseller: \\$90](#), [Reseller: \\$76](#))

Proxmark 3 R&D Kit (RDV4.01) ([Reseller: \\$335](#))

[4. MITM Keyloggers](#)

Description: Record user keystrokes, emulates trusted devices, remotely access data, keystroke injection, and more.

Manufacturer: [Hak5](#)

Models:[Hak5's Key Croc](#) ([Official: \\$120](#), [Reseller: \\$190](#))

[Keelog's Keygrabber](#): ([Official: \\$134](#))

[Keelog's AirDrive](#): ([Official: \\$60](#))

3. USB Rubber Ducky

Description: [As seen on Mr.Robot...](#) Covert USB that injects keystrokes, spoofs known hardware ids, store files locally, and [run custom ducky scripts](#) for any situation. Has an active community with fan-made tools like [USB Rubber Ducky App](#).

Manufacturer: [Hak5](#)

Models: [Hak5's USB Rubber Ducky](#) (Official: \$80)

[DSTIKE's WiFi Duck](#) (Official: \$35)

[Spacehuhn's USB Nova](#) (Official: €39)

2. WiFi Pineapple

Description: A complete network penetration test suite device. Perform MITM attacks by mimicking trusted networks for vulnerable targets, capture WPA handshakes and imitate access points, limit attacks by MAC and SSID, offers an easy-to-use web interface, monitor and log all network traffic, de-auth web clients, and more. Supports [3rd party modules](#) and actively receives updates from contributors.

Manufacturer: [Hak5](#)

Models: [Hak5's WiFi Pineapple Mark VII](#) (Official: \$120)

[Hak5's WiFi Pineapple Enterprise](#) (Official: \$1200+)

Hack Gadget's WiFi Pineapple (Official: \$100)

[Pwn-a-gotchi](#) (Build your own [for cheap](#))

1. Flipper Zero

Description: Monitor and play back sub-1 GHz frequencies for every day devices like smart home accessories, sensors, and garage doors. Read, store, and clone low-frequency proximity card tags along with high-frequency RFID devices such as Credit Cards, Wii Amibos, keyless entry doors, and more. Also includes an infrared transmitter (and receiver) to control basic devices including TVs, fans, and other remote controlled devices.

Manufacturer: [Flipper Devices](#)

Models: [Flipper Zero](#) (Official: \$169)

[Flipper One](#) (Under Development)

Honorable Mentions [Mischief Gadget's O.MG Cable](#) (Official: \$90)

Hak5's WiFi Coconut (Official: \$200)

Hak5's Bash Bunny (Official: \$120)

Hak5's Screen Crab ([Official: \\$200](#))

[Great Scott Gadget's HackRF One](#) ([Reseller: \\$350](#), [Reseller: \\$340](#), [Reseller: \\$390](#))

USB Kill V4 ([Official: \\$85](#))

Signal Jammers ([\\$100+](#))

Cooligan - January 27, 2023, 9:50 am

Awesome thread, this is definitely a very helpful list when it comes to hacking tools in general. I also really like that you included some Hak5 links.

Huge shoutout to @xadamxk for making this, always great work you noob.
Will miss you <3

Sky - January 27, 2023, 10:00 am

Cool to repost adam's thread, but did you need to play it off like it's credited to Lion's League lol.
Would be better to just let adam get his flowers.

flavoral - January 27, 2023, 10:06 am

Would be better to just let adam get his flowers.

It was his request. Ty for the suggestion tho, adding some flowers too xD.

Sky - January 27, 2023, 10:12 am

Well if it's what he requested, then carry on. lol

And I didn't mean literal flowers, but do it anyway lmao.

Zexi - January 28, 2023, 5:28 am

Wish there was a thread back when i wanted to become Mr Robot when i grow up.

Rn id just cop Flipper Zero to turn off TVs at tech shops.

You may call me V - February 19, 2023, 11:56 am

Thanks for sharing these gadgets, much appreciated

Dread.Reaper - February 21, 2023, 6:31 am

Never heard of hackerwarehouse.com They got a decent selection of stuff.

The_unknown - April 2, 2023, 8:07 am

Hi thank you for this very detailed collection of hacking tools. It helps me a lot

Anka Warrior - September 1, 2023, 5:00 am

Thanks mate, I was looking for these too.

Lutherking - September 13, 2023, 6:11 pm

Thank you for sharing very useful information.

PrimitiveEyes - November 30, 2023, 12:19 pm

Thx I really appreciate this thread. Really helpful

Cya

placebo - December 2, 2023, 8:34 am

Thanks a million, Sky! Your insights on Flavorful really opened my eyes to new perspectives. Your thoughtful and well-articulated post has been incredibly valuable. Keep sharing your wisdom – it's much appreciated! [warn]

Immortal - December 3, 2023, 10:37 am

Here is some hardware I would like to see added.

G.O.A.T disk: <https://shop.obsidianintel.com/products/g-o-a-t-disk>

What it does: G.O.A.T., your own multi-boot disk, packed with every Operating System imaginable, and these are not the stripped-down versions, G.O.A.T. is packing 128GB of the highest quality memory along with USB 3.2, if you want to be first place you need the right hardware to pair with your GOAT like skill. We have also included a custom iPXE build that links you to Obsidian PXE Netboot Servers with custom OS for live booting.

USB Dagger: <https://shop.obsidianintel.com/products/dagger-usb>

What it does: A custom multi boot pOS which is configured to boot a curated secureOS, SIGINT_OS, Kali, Discreete, ObsidianArch w/BlackICE, NetSecToolKit, GeexBox, voice/video/msg, Hiren's Windows Enterprise and many more, auto locking with kill switch, 105G user space on a legendary Apricorn NXC or Aegis 3.0

Please specify BIOS or UEFI without secure boot.

Decent!

MFUK - December 6, 2023, 2:22 am

Flipper zero I can vouch for decent product one you feel comfortable try replacing the flippers firmware with something that has little more spice then since you have access to gpio pins you can make or buy premade modules to extend subghz WiFi or Bluetooth distance and strength

You can also do this all on raspberry pi but that ain't fun

Stanley - March 7, 2024, 3:11 pm

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first

post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

elijahog12 - March 28, 2024, 4:10 pm

would i be able to shit the flipper in canada without any issues

(Mar 28, 2024 04:10 PM)elijahog12 Wrote: [\[CITE\]](#) would i be able to shit the flipper in canada without any issues

You'll be able to ship it. The Canadian authorities walked back the ban due to the backlash from almost everybody in the know.

Tocx - May 3, 2024, 6:39 pm

Mr. Robot feeling atm. Gj brotha <3

micronrx15 - May 8, 2024, 7:02 am

I want buy fliperzezo but can you say me if you sending in croatia?

R4TKN - December 22, 2024, 7:55 pm

new more tools are good i have pwnagotchi
