Testing some providers at the moment to find the right one for me, do you give out 24h trials?

I received a month subscription for vouch copy. I have added to my Samsung TV and everything looks to be working. Has lot of channels and movies and what not. So far can vouch for this. I will update here after few days of usage.

Thank you!

Great customer support and the streaming service is awesome, \$5 a month for a lot of live tv + collection of shows and movies, no complaints at all. No need to pay for anything else really.

Thank you for the trail, I will be back next week to buy.

do you have preview videos or channel lists for English/Spanish? most iptv providers aren't really that good. but I am always intrigued to give them a shot in hopes of finding a good one haha

Haven't had good experiences with some of these, looking for a good one. Is there any chance by getting 1 day trial to test it out? Will definitely purchase and be a long time customer if its good.
