What's everyone favorite shoe

My daily "driver" is always a Adidas Stan Smith. Usually going through 3-4 pairs a year.

They're perfect for all outfits! I can wear them with a pair of chinos and a shirt and they are acceptable to a business casual style.

I can also wear them after work with a pair of jeans and a t-shirt and they're still nice!

Besides of that my second choice is always a nice pair of dress shoes.

Definitely Sanuks, I was a huge fan of them before Hey Dudes came out. I think the Hey Dudes look alright, but cant bring myself to join that wave. If im going out and the sanuks arent nice enough I keep a couple high top nike AF1s

Air Jordan Shoes are all stylish and comfortable to wear.

I'll wear whatever as long as it last long.

Usually thats a pair of vans or Nikes. I remember one time I wore a single pair of shoes for probably around 3 years.

Back when I graduated high school and was focused on saving money.

My favorite shoes are Nike AF1. Definitely the best basic shoe out there.

Hands down the Air Force 1. Air Max 97 as well.

Air Jordan 1 - Smoke Grey, I mean they're amazing to wear, comfy, and look amazing.

I want black cats or military black next.

My day to day go to footwear is the Dunlop purofort
Ain't nothing on these bad boys at £110 a pair.
I work in sewage so these are great for wading through turds.

When I finally got around to getting a pair of AF1s I realized how great they are. Stylish but also extremely comfortable. I hear Yeezy Boost 500s and 700s are even more comfortable but they're most expensive.

The Turd-inator 2000 boots! Love the colour of them! Really make the poop stand up.
